GEOSYNTHETIC DATA

GeoIndex is a unique and powerful online geosynthetic materials database, providing its users instantaneous, interactive access to geosynthetic product data. Engineers, designers, specifiers, regulators and others around the world can quickly and efficiently find materials which meet their design and specification needs.

LISTING

- » List your products in a searchable, sortable format.
- » Your full-page advertisement delivers an excellent overview of your company and increases your online exposure.
- » Each product listing links directly to your complete manufacturer's spec sheet.
- » Immediate access to manufacturer contact provides site users instant access to you.
- » Real-time information updates mean your material data and contact information are always current – **updates are always made free of charge!**

DATABASE CATEGORIES

Erosion Control - GCLs - Geocells - Geogrids - Geomembranes - Geonets
 - Geotextile Tubes - Geotextiles - Pavement Edge Drains - Sheet Drains - Vertical Wick Drains

The Geosynthetic Materials Database

When potential clients search for solutions, make sure your products are considered....

Product Leaderboard Ad

Available on all material category pages

- » Measures 468px X 60px

Information Pages Leaderboard Ad

Available on Home, How To, Companies, Tech Guidance and Contact pages

- » Measures 468px X 60px

Advertising Banner

- » Targeted product sections.
- » Only 5 ads per product category.
- » Keep your space current by changing ads throughout the year at no charge.
- » Earn complimentary product line listings with every ad purchased.
- » Earn discounted product line rates with every ad purchased

Information Pages Sidekick Ad

Available on Home, How To, Companies, Tech Guidance and Contact pages

- » Measures 180px X 150px

Benefit - 1 year of Advertising/Listing
